Microsoft Copilot Studio

A tool that allows you to create virtual assistants - **known as copilots** - that can converse and assist people.

These copilots are quite smart, using **artificial intelligence** to do everything from giving quick answers to simple questions to having detailed discussions to solve more complex issues.

They can talk to customers or employees in **many languages** and can be used on **different online platforms** like websites, mobile apps, and social media, including Facebook and Microsoft Teams, as well as through any service that works with the Azure Bot Framework.
