Agents in BizChat

What are they?

Agents in BizChat are like little Christmas helpers, working tirelessly to make user interactions **smooth** and **delightful**.

With the magic of natural language commands and an intuitive setup, they're crafted to simplify tasks and boost productivity within the **Microsoft 365 Copilot** ecosystem.

Whether it's managing inquiries or automating routine tasks, these agents are here to sprinkle a touch of efficiency and joy into your business operations.

Agents in BizChat

Create image generator

Add **general** information:

- icon
- meaningful name
- description
- instructions

Instructions act as the agent's playbook, enabling it to handle complex queries confidently and consistently.

The screenshot shows the Copilot Studio Holiday Image Crafter interface. At the top, there are tabs for 'Describe', 'Configure' (which is selected), and 'Try it'. A 'Create' button is in the top right. Below that, a 'Template' dropdown is set to 'None'. The 'Details' section includes a placeholder icon and a 'Name' field containing 'Holiday Image Crafter'. The 'Description' field contains a detailed text block about the agent's capabilities. The 'Instructions' section contains a text block describing how the agent will generate images based on user prompts. At the bottom, a note states: 'AI-generated content may be incorrect | Copilot Studio capabilities in M365 are processed by the Copilot Studio service. By using this experience, you agree to these [Terms](#) | [Privacy and cookies](#)'.

Agents in BizChat

Create image generator

Enable toggler
Image generator.

Add Starter prompts.

Starter prompts will appear at the beginning of the chat to guide users on what they can ask.

The screenshot shows the Copilot Studio Holiday Image Crafter interface. At the top, there's a 'Create' button and a 'Configure' tab which is selected. Below the tabs, there's a 'Web content' section with a toggle switch that is turned off. Under 'Actions (coming soon)', it says 'Empower your agents with actions for specific tasks and capabilities.' with a link to 'Go to full Copilot Studio to create agents with actions'. In the 'Capabilities' section, the 'Image generator' toggle switch is turned on, indicated by a blue arrow pointing up next to it. The 'Starter prompts' section lists three items:

Title	Message
Living room	Create a Christmas-themed living room with a decorated tree
Santa delivering gifts	Show Santa delivering gifts under a starry winter sky.
Snowy landscape	Generate a snowy landscape with a cozy wooden cabin.

At the bottom, there's a note: 'AI-generated content may be incorrect | Copilot Studio capabilities in M365 are processed by the Copilot Studio service. By using this experience, you agree to these [Terms](#) | [Privacy](#) and [cookies](#)'.
